Flora of the grassland communities (meadows, pastures, orchards, wetlands) was studied in the central part of Strážovské vrchy Mts during the growing season 2002. Altogether 550 taxa of vascular plants were recorded, 36 taxa belong to threatened species (5 endangered, 18 vulnerable, 12 lower risk, 1 data deficient).

**Keywords:** Čavoj, flora of vascular plants, grassland communities, Valaská Belá.

Práca prináša výsledky floristického terénneho prieskumu okolia obcí Valaská Belá, Čavoj a Temeš uskutočneného v roku 2002. Táto časť Strážovských vrchov patriaca orograficky do Zliechovskej hornatiny je floristicky pomerne málo preskúmaná. Botanici oddávna venovali pozornosť predovšetkým okolitým vrcholom s bohatou vápencovou teplomilnou vegetáciou. Preto sme o flóre sledovaného územia našli iba ojedinelé zmienky v niektorých dieloch Flóry Slovenska (Bertová et al. 1988, Bertová et al. 1992, Goliašová et al. 1997) a v správe z geobotanického mapovania Slovenska (Jurko, 1967).

Predmetom výskumu boli najmä trávne porasty (lúky, pasienky, sady, záhrady) a čiastočnú pozornosť sme venovali mokradiam, okrajom ciest a ruderalizovaným porastom. Uvedené taxóny s ľažiskom výskytu v lesných ekosystémoch boli zistené v skupinách drevín v rámci trávnych porastov, na lesných okrajoch alebo v lesných porastoch v bezprostrednom okolí popisovaných lokalít.

### Metodika

Názvoslovie vyšších rastlín je podľa práce Marhold & Hindák (1998). Kategorizácia ohrozených a vzácných druhov je podľa práce Feráková, Maglocký & Marhold (2001).: EN – ohrozené, VU – zraniteľné, LR: nt – menej ohrozené, DD – chýbajúce alebo nedostatočné údaje. Označenie § je použité pre taxóny podliehajúce legislatívnej ochrane podľa Vyhlášky MŽP SR (2003). Kategorizácia endemitov je podľa práce Klimenta (1999): KZ – západokarpatský endemit, KZs – západokarpatský subendemit. Dokladový materiál (herbár a fotoarchív) je uložený u autoriek príspevku.

### Charakteristika územia

Podľa geomorfologického členenia Slovenska (Mazúr & Lukniš 1978) patrí sledované územie v rámci provincie Západné Karpaty a subprovincie Vnútorné Západné

Karpaty do Fatransko-tatranskej oblasti, celku Strážovské vrchy a podcelku Zliechovská hornatina (v rámci neho zasahuje do časti Belianska vrchovina, Temešská vrchovina a Belianska kotlina). Niekolko lokalít z okolia Nevidzian a Lomnice v juhovýchodnej časti skúmaného územia patrí do celku Hornonitrianska kotlina, podcelku Rudnianska kotlina. Výškové rozpäťie sledovaného územia je 572 m (najnižšie miesto pri potoku Nitrica v obci Lomnica – 320 m n. m., najvyššie položená kóta pri osade Koškarovci – 892 m n. m.).

Geologické podložie v severnej a západnej časti územia je tvorené najmä vápenovo-dolomitickými, ilovcovo-vápencovými a pieskovcovovo-zlepencovými horninami (vápence, dolomity, ilovité bridlice, pieskovce, slieňovce a kremence), v južnej a východnej časti (Koškarovci, Šindliarovci, Čavoj-Biela voda, Čavojec-Poddán, Temeš, Nevidzany, Lomnica) sa nachádzajú metamorfované horniny (granity, granodiority, diority, migmatity a pararuly). Pri potokoch sa nachádzajú fluviálne sedimenty (Mahel' 1982). Presnejšie údaje o geologickom podloží sú uvedené v popise lokalít.

Podľa fytogeografického členenia Slovenska (Futák 1984) patrí územie do oblasti západokarpatskej flóry (Carpaticum occidentale), obvodu predkarpatskej flóry (Praecarpaticum), okresu Strážovské a Súľovské vrchy. Potenciálnu prirodzenú vegetáciu (Michalko et al. 1986) na väčšine územia tvoria bukové lesy kvetnaté a bukové kvetnaté lesy podhorské (*Eu-Fagenion*). V alúviu Nitrice sú zastúpené lužné lesy podhorské (*Alnenion glutinoso-incanae*) a ostrovčekovite sa na veľmi malých plochách vyskytujú aj bukové kyslomilné lesy podzväzu *Luzulo-Fagenion* (Jurko 1967).

### Výsledky a diskusia

Počas terénneho prieskumu bolo zaznamenaných 554 taxónov vyšších rastlín, ktoré sú nižšie uvedené v abecednom poradí s číslami lokalít, kde boli zistené. Poloha lokalít je znázornená na obr. 1.

#### Zoznam lokalít

(číslo lokality, názov a popis lokality, geologické podložie, nadmorská výška, geografické súradnice stredu lokality, čísla štvorcov mapovania):

1. prielom Nitrice, skalnaté svahy a extenzívne pasienky po oboch stranach cesty, vápence, dolomity, bridlice a pieskovce, 475 – 530 m n. m., 18°22'41", 48°53'28", 7176a.
2. Maslák, intenzifikované a dosť ruderalizované lúky v okolí osady, pestré bridlice, dolomity a pieskovce, 530 – 600 m n. m., 18°22'37", 48°53'56", 7076c, 7176a.
3. Valaská Belá, SZ okraj obce, rozsiahle intenzifikované lúky na JZ až JV svahoch pod kótou 608 m, v súčasnosti neobhospodarované, miestami prepásané kravami a kozami, pestré bridlice, dolomity a pieskovce, 500 – 570 m n. m., 18°23'02", 48°53'35", 7076c, 7176a.
4. Valaská Belá, nad sklárnou, prevažne kosené lúky na S – SV svahoch, dolomity, bridlice a pieskovce, 475 – 525 m n. m., 18°22'41", 48°53'06", 7176a.
5. Šrámkovci, pasienky v okolí osady, V a SV svahy, dolomity, bridlice a pieskovce, 500 – 610 m n. m., 18°22'34", 48°52'48", 7176a.

6. Valaská Belá, J okraj obce, pasienky na strmších SV – SZ svahoch, dolomity a kremence, 475 – 525 m n. m., 18°23'10", 48°53'02", 7176a.
7. Valaská Belá, J okraj obce, lúky a pasienky okolo kóto 505 m, nad cintorínom, V orientované svahy Zábojnickej doliny, dolomity, vápence, pieskovce, bridlice a slieňovce, 480 – 600 m n. m., 18°23'10", 48°53'17", 7176a.
8. Trhanovci, Toporovci, najmä neobhospodarované a miestami pasené lúky v okoli osád, dolomity, pestré a piesčité bridlice, kremence, 475 – 675 m n. m., 18°22'37", 48°52'23", 7176a.
9. Číkovi, lúky a bývalé polia V a J od osady, na SZ orientovaných svahoch Zábojnickej doliny, dolomity, bridlice a kremence, 450 – 575 m n. m., 18°23'60", 48°52'52", 7176a.
10. Račkovci, Ondrejkovci, prevažne intenzifikované lúky v okoli osád na V a JV svahoch, slienité vápence a slieňovce, 500 – 700 m n. m., 18°22'34", 48°54'36", 7076c.
11. Škripov, niva potoka, častočne kosená, prevažne ruderálizovaná, slienité vápence a slieňovce, 490 – 500 m n. m., 18°23'13", 48°54'47", 7076c.
12. Končina, zanedbané a zarastajúce lúky na SZZ svahoch Končiny, slienité vápence a slieňovce, 600 – 725 m n. m., 18°23'35", 48°54'36", 7076c.
13. Môcikovci, lúky a mokraď na JZ svahoch Končiny, bridlice, pieskovce a vápence, 475 – 550 m n. m., 18°23'24", 48°54'18", 7076c.
14. Končina, lúky na hrebeni, vápence, slieňovce a sliene, 700 – 825 m n. m., 18°24'11", 48°54'36", 7076c.
15. Michalovci, lúky, sady a bývalé pasienky v okoli osady, na JZ svahoch Končiny, dolomity, 475 – 575 m n. m., 18°23'60", 48°54'04", 7076c.
16. Ďurovci, ZSZ svahy Vysokého vrchu, lúky nad ihriskom, v hornej časti ruderálizované, dolomity, 460 – 500 m n. m., 18°24'04", 48°53'38", 7176a.
17. Múčkovci, lúky a pasienky v okoli osady, dolomity, vápence, bridlice, 500 – 625 m n.m., 18°24'40", 48°53'60", 7076c.
18. Múčkovci, breh potoka na V úpatí Vysokého vrchu, J od osady, v blízkosti opusteného lomu, tmavé vápence, dolomity, 475 m n.m., 18°24'47", 48°53'42", 7076c.
19. Štrbkovci, pasienky a krovinaté stráne v okoli osady, vápence, dolomity, slieňovce, bridlice a pieskovce, 450 – 530 m n. m., 18°24'54", 48°53'28", 7176a, 7176b.
20. Vysoký vrch, lúky a bývalé polia na J svahoch Vysokého vrchu S od Valaskej Belej, zčasti kosené, v hornej časti zarastené drevinami, sliene, slieňovce, bridlice, vápence a dolomity, 450 – 580 m n. m., 18°24'25", 48°53'20", 7176a.
21. Hupkovci, lúky a pasienky pri osade, väčšinou Z a SZ svahy, dolomity, vápence a bridlice, 455 – 615 m n. m., 18°25'19", 48°53'42", 7076d, 7176b.
22. Angušínovci, prevažne intenzifikované lúky v okoli osady a na SV svahu až po Slávikovu dolinu, kremence, bridlice a vápence, 440 – 615 m n. m., 18°25'48", 48°53'56", 7076d.
23. Slezákovci, Kopilec, Dutovci, Šupinovci, Slávikovci, lúky a pasienky v okoli osád, prevažne na V a SV svahoch, slieňovce, pieskovce, vápence, silicity, ilovité a slienité bridlice, 425 – 606 m n. m., 18°26'13", 48°53'46", 7076d, 7176b.
24. Macovci, drevinami zarastajúce lúky na Z svahoch v okoli osady, bridlice, slieňovce, 470 – 665 m n. m., 18°25'34", 48°53'28", 7176b.
25. Púčkovci, lúky pri ceste k osade a v okolí osady, vápence, dolomity, slieňovce, bridlice a pieskovce, 550 – 700 m n. m., 18°25'52", 48°53'28", 7176b.
26. Slávikova dolina, nivné lúky a ruderálizované plochy, fluviálne sedimenty, 420 – 453 m n. m., 18°26'24", 48°53'60", 7076d.
27. Vlčkovci, lúky a pasienky v okoli osady, SV svahy, kremité biotitické pararuly, 425 – 575 m n. m., 18°25'30", 48°52'52", 7176b.

28. Nitrica, nivné lúky Nitrice medzi Klinom a Valaskou Belou, fluviálne sedimenty, 395 – 425 m n. m., 18°25'41", 48°52'55", 7176b.
29. Chrumkovci, Pánisovci, lúky v okolí osád, v spodnej časti zarastené, kremité biotitické pararuly, 425 – 625 m n. m., 18°25'48", 48°52'34", 7176b.
30. Kapušárovci, lúky a políčka v okolí osady, polovica z nich v súčasnosti kosená, kremité biotitické pararuly, 400 – 575 m n. m., 18°26'20", 48°52'26", 7176b.
31. Matušíková, svahové a nivné lúky v okolí osady, prevažne S svahy, migmatity, granity a delu-viálne sedimenty, 18°26'53", 48°52'37", 7176b.
32. Nitrica, nivné lúky Nitrice a ruderálne plochy v blízkosti cesty v úseku od Klina po Nitrianske Rudno, fluviálne sedimenty, 340 – 390 m n. m., 18°28'12", 48°50'49", 7176b, 7176d.
33. niva v sútoku Zliechovského potoka a Jaseniny, fluviálne sedimenty, 430 m n. m., 18°27'47", 48°54'25", 7076d.
34. Gápel, ruderálizované pasienky a zarastajúce stráne JZ od obce, S svahy, silicity, slieňovce, vápence, bridlice, 475 – 525 m n.m., 18°28'34", 48°54'25", 7076d.
35. Gápel, čistinka pri ceste 3 km Z od obce pri kóte 460, dolomity, 460 m n.m., 18°28'41", 48°54'36", 7076d.
36. Petriskovci, intenzifikované a zanedbané lúky na SZ svahoch pod osadou, čiastočne spásané, kremence, slieňovce, vápence a bridlice, 450 – 550 m n. m., 18°27'47", 48°54'07", 7076d.
37. Kučerovci, Petriskovci, Šunegovci, väčšinou intenzifikované lúky a pasienky na svahoch Čavojského vrchu, kremité biotitické pararuly, 580 – 660 m n. m., 18°27'54", 48°53'46", 7076d, 7176b.
38. Koškarovci, pasienky SZ od osady, SV svahy pod kótou 725 m, biotiticko-oligoklasové grandiority až kremité diority, 650 – 724 m n. m., 18°28'44", 48°53'56", 7076d, 7176b.
39. Koškarovci, Šindliarovci, lúky a pasienky v okolí osád, mnohé zarastajúce, biotiticko-oligo-klasové grandiority, leukokrátne granity, 620 – 892 m n. m., 18°29'06", 48°53'38", 7176b.
40. Cobrial, lúka JZ od osady, deluviálne sedimenty, slieňovce a pieskovce, 580 – 630 m n. m., 18°29'35", 48°53'46", 7176b.
41. Cobrial, slatinné pramenisko pri osade, deluviálne sedimenty hlinito-kamenité, 600 m n. m., 18°29'35", 48°53'49", 7176b.
42. Cobrial, lúky a pasienky okolo osady, dolomity, kremence a pararuly, 600 – 675 m n. m., 18°29'38", 48°53'60", 7076d, 7176b.
43. Čavoj, Dolná Biela Voda, lúky sady a medze okolo kóty 615 m, V a JV od osady Biela Voda, biotiticko-oligoklasové grandiority až silikátové diority, granity, 550 – 600 m n. m., 18°28'48", 48°53'17", 7176b.
44. Čavoj, Biela Voda, suchšie lúky na J a JZ svahoch medzi osadou Biela Voda a Čavojom, slieňovce a pieskovce a biotiticko-oligoklasové grandiority 560 – 640 m n. m., 18°29'31", 48°53'13", 7176b.
45. Čavoj , lúky a políčka na J okraji obce, S svahy, vápence, dolomity, silicity, slieňovce a bridlice, 550 – 660 m n. m., 18°29'31", 48°52'55", 7176b.
46. Čavoj, slatinné pramenisko na J okraji obce nad cintorínom, slieňovce, vápence a bridlice, 600 – 610 m n. m., 18°29'24", 48°52'52", 7176b.
47. Čavojec-Podlán, údolie Čavojeckejho potoka a stráne nad ním, lúčky s medzami, okraje ciest, migmatity, granodiority, diority a dolomity 450 – 590 m n. m., 18°28'44", 48°52'44", 7176b.
48. Temeš, Čavoj, lúky medzi obcami, väčšinou nekosené a zarastajúce, migmatity a pararuly, 520 – 650 m n. m. , 18°28'48", 48°52'30", 7176b.
49. Temeš, lúky, pasienky a väčšinou zarastené políčka a úhory S a Z od obce, pararuly a granity, 520 – 580 m n. m., 18°28'48", 48°52'12", 7176b.
50. Temeš, lúky V a J od obce, pararuly a granity, 500 – 680 m n. m., 18°29'02", 48°52'08", 7176b.

51. Nevidzianka, zbytky zarastajúcich lúk nad údolím potoka S od obce Nevidzany, pararuly, pri potoku fluviale sedimenty, 425 – 600 m n. m., 18°29'10", 48°51'11", 7176b, 7176d.
52. Nevidzany, intenzifikované lúky Z od obce, okolo kóty 442, migmatity, 350 – 442 m n. m., 18°28'44", 48°50'35", 7176d.
53. Lomnica, nevyužívané pasienky Z od obce a lúky s poličkami na S okraji obce, Z svahy, migmatity, 320 – 450 m n. m., 18°28'08", 48°50'02", 7176d.
54. Nevidzany, zarastajúce pasienky V a JV od obce, Z a JZ svahy, prevaha pieskovcov, brekcie a zlepence, 350 – 562 m n. m., 18°29'31", 48°50'20", 7176d.

### Zoznam taxónov vyšších rastlín

*Acer campestre* 9, 21, 22; *Acetosa pratensis* 6, 7, 8, 9, 11, 12, 13, 14, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 33, 34, 36, 37, 38, 39, 40, 41, 42, 44, 45, 47, 48, 49, 50, 51, 53, 54; *Acetosella vulgaris* 2, 6, 7, 9, 20, 21, 22, 30, 31, 39, 42, 44, 47, 48, 50, 51; *Achillea collina* 1, 44; *A. millefolium* agg., 1, 2, 3, 4, 5, 7, 8, 9, 10, 11, 12, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 42, 43, 45, 47, 48, 49, 50, 51, 52, 53, 54; *Acinos alpinus* 42; *A. arvensis* 1, 17, 20, 21, 44, 46, 47; *Actaea spicata* 10; *Aegopodium podagraria* 11, 22, 28, 32, 38, 39, 53; *Aesculus hippocastanum* 9; *Agrimonia eupatoria* 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 20, 21, 22, 23, 26, 28, 29, 35, 36, 39, 42, 43, 44, 45, 47, 48, 49, 51, 52, 53, 54; *Agrostis canina* 9; *A. capillaris* 1, 2, 4, 6, 7, 8, 9, 10, 12, 15, 16, 17, 19, 22, 23, 24, 25, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 43, 44, 45, 47, 48, 49, 50, 51, 52, 53, 54; *A. gigantea* 2, 5, 8, 10, 11, 15, 17, 28, 32, 53; *A. stolonifera* 2, 10, 21, 23, 26, 32, 54; *Ajuga genevensis* 1, 12, 14, 17, 21, 43, 47, 48, 53; *A. reptans* 18, 22, 23, 26, 33, 34, 39, 45; *Alchemilla* sp. 1, 2, 3, 7, 8, 9, 10, 11, 13, 17, 18, 19, 20, 21, 22, 23, 24, 27, 28, 29, 30, 31, 33, 34, 35, 36, 37, 38, 39, 41, 42, 43, 44, 45, 47, 48, 49, 51, 53; *Alisma plantago-aquatica* 26, 32, 33; *Allium oleraceum* 10, 30; *A. scorodoprasum* 3, 5, 8, 10, 14, 34, 36, 40, 42, 50, 51, 52; *Alopecurus pratensis* 11, 14, 19, 23, 24, 25, 27, 30, 31, 33; *Amaranthus* sp. 32, 47; *Anagallis arvensis* 6, 8, 32, 43, 45, 51, 52, 53, 54; *Angelica sylvestris* 26, 32, 33; *Antennaria dioica* 1, 22, 51; *Anthemis arvensis* 11, 19, 30, 32, 49, 50, 52; *Anthericum ramosum* 40; *Anthoxanthum odoratum* 2, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 17, 19, 20, 21, 22, 23, 24, 25, 27, 30, 31, 33, 36, 39, 44, 45, 47, 48, 49, 50, 51, 52, 53, 54; *Anthriscus sylvestris* 1, 2, 3, 5, 6, 7, 8, 9, 10, 11, 13, 14, 15, 17, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 34, 36, 37, 39, 42, 43, 44, 45, 47, 48, 49, 50, 53, 54; *Anthyllis vulneraria* 1, 3, 4, 5, 6, 7, 8, 9, 10, 12, 16, 17, 18, 19, 20, 21, 22, 25, 36, 39, 42, 43, 44, 45, 46, 47, 48, 49, 50, 53, 54; *A. vulneraria* subsp. *polypylla* 47; *Apera spica-venti* 52; **LR: nt** *Aquilegia vulgaris* 45; *Arabidopsis thaliana* 19; *Arabis glabra* 23; *A. hirsuta* 1, 6, 8, 10, 17, 18, 19, 21, 23, 24, 26, 31, 34, 39, 42, 44, 45, 48, 54; *Arctium lappa* 51; *A. nemorosum* 53; *A. tomentosum* 2, 10, 28, 32, 34, 44; *Arenaria serpyllifolia* 1, 2, 17, 19, 20, 30, 32, 48; *Armoracia rusticana* 10, 45, 47; *Arrhenatherum elatius* 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 27, 28, 29, 30, 32, 34, 36, 37, 39, 40, 42, 43, 44, 45, 47, 48, 49, 50, 52, 53, 54; *Artemisia absinthium* 39; *A. vulgaris* 1, 2, 4, 10, 11, 15, 17, 19, 22, 23, 26, 30, 32, 35, 39, 42, 43, 44, 47, 48, 49, 50, 51, 52, 53; *Asarum europaeum* 1, 9, 10, 12, 39, 45; *Asperula cynanchica* 1, 3, 6, 8, 10, 12, 13, 15, 16, 17, 18, 20, 21, 44, 54; *A. tinctoria* 40; *Asplenium ruta-muraria* 1; *A. trichomanes* 1, 9; *A. viride* 9; *Astragalus glycyphyllos* 3, 6, 8, 10, 17, 20, 21, 22, 32, 34, 39, 40, 42, 43, 47, 48, 49, 50, 51, 52, 53; *Astrantia major* 40, 48; *Athyrium filix-femina* 9, 27; *Atriplex* sp. 32; *Avena fatua* 50; *Avenula pubescens* 33.

*Ballota nigra* 30; *Barbarea vulgaris* 26; *Bellis perennis* 8, 15, 17, 18, 19, 21, 22, 23, 27, 45, 47, 54; *Berberis vulgaris* 26; *Betonica officinalis* 1, 3, 5, 6, 7, 9, 10, 17, 19, 20, 21, 22, 24, 27, 34, 37, 39, 45, 48, 50; *Betula pendula* 9, 46; *Bidens* sp. 30; *Blysmus compressus* 16, 18, 21; *Brachypodium pinnatum* 1, 7, 10, 15, 16, 17, 40, 42, 44, 45, 46, 54; *B. sylvaticum* 1, 2, 4, 6, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 35, 42, 44, 45, 47, 49, 51, 53, 54; *Briza media* 1, 2, 3, 4, 6, 7, 8, 9, 10, 12, 14, 15, 16, 17,

18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 29, 30, 31, 33, 36, 37, 39, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 53, 54; *Bromus benekenii* 22; *B. erectus* 1, 3, 9, 16, 22, 42; *B. hordeaceus* 1, 2, 3, 11, 13, 15, 21, 22, 44, 49, 54; *B. inermis* 10; *B. sterilis* 20; *Bunias orientalis* 44.  
*Calamagrostis arundinacea* 36, 38; *C. epigejos* 1, 2, 6, 7, 8, 9, 10, 15, 17, 18, 20, 22, 25, 27, 28, 29, 30, 31, 33, 34, 37, 39, 40, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54; *C. varia* 46; *Caltha palustris* 7, 8, 9, 11, 13, 16, 20, 21, 23, 26, 32, 33, 39, 40, 46, 48; *Calystegia sepium* 32; *Campanula cervicaria* 36; *C. glomerata* 7, 9, 10, 12, 14, 15, 17, 20, 22, 24, 34, 38, 39, 40, 42, 43, 45, 46, 47; *C. patula* 1, 3, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 36, 37, 38, 39, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54; *C. persicifolia* 12, 20, 23, 24, 36, 37, 45, 47, 48, 49; *C. rapunculoides* 1, 2, 3, 5, 7, 8, 10, 15, 19, 21, 22, 25, 28, 30, 39, 43, 44, 45, 47, 48, 49, 50, 54; *C. trachelium* 5, 8, 9, 10, 11, 22, 23, 29, 30, 34, 43, 44, 45, 48; *Capsella bursa-pastoris* 1, 2, 19, 27, 30, 32, 43, 44, 45, 47, 49, 51; *Cardamine amara* 27, 48; *Cardaminopsis arenosa* agg. 1; *Carduus acanthoides* 1, 2, 3, 10, 11, 15, 16, 17, 19, 20, 21, 22, 31, 36, 43, 44, 47; *C. crispus* 11, 26, 29, 32, 33, 34, 46, 47; *Carex acutiformis* 26; *Xanthoxalis stricta* 45.

V literatúre sa okrem týchto taxónov zo širšieho okolia Valaskej Belej uvádzajú: *Potentilla tabernaemontani* – Čavoj [ut *P. neumanniana*, Scheffer 1940 SLO in Goliašová (1992: 215)], *Crataegus rhipidophylla* – Valaská Belá [ut *C. curvisepala*, Jurko 1964 in Baranec & Bertová (1992: 479)], *Chamaecytisus ratisbonensis* – Valaská Belá NW [Soják 1964 PR in Holub & Bertová (1988: 43)], *Epilobium obscurum* – Nevidzany [Scheffer 1924 SLO in Holub & Kmet'ová (1988: 467)], *Epilobium*

*palustre* – Nevidzany [Scheffer 1924 SLO in Holub & Kmeťová (1988: 471)], *Euphrasia tatarica* – Temeš, Temešianska dolina [Futák 1941 SLO in Králik (1997: 336)], *Cardamine pratensis* – Valaská Belá, potok Jasenina pri sútoku s potokom Šindeliarska [Šťastná et Hadinec 1978 in Marhold & Kochjarová (2002: 336)], Valaská Belá, pri potoku Belanka [Scheffer 1940 SLO in Marhold & Kochjarová (2002: 336)] a *Cardamine matthioli* – Valaská Belá E, pri križovatke Zliechov – Čavoj [Šťastná et Hadinec 1978 in Marhold & Kochjarová (2002: 345)]. Jurko (1967) okrem viacerých z horeuvedených druhov naznamenal v nelesných spoločenstvach *Erodium cicutarium* na lokalite v alúviu Belanky povyše Valaskej Belej.

Z celkového počtu 550 taxónov zistených počas nášho terénnego prieskumu patrí 18 k chráneným druhom a 36 k vzácnym a ohrozeným druhom. Jednotlivé kategórie ohrozenosti sú zastúpené nasledovne: LR: nt – 12 taxónov, VU – 18 taxónov, EN – 5 taxónov, DD – 1 taxón.
